

2009 WHIP Access Control (472) Requirements

- **Eligible lands:** Private agricultural land, private nonindustrial forestland, and tribal lands where access control is needed to protect and enhance natural resources including forests, sensitive areas (i.e. water bodies, water conveyances, wetlands, and sinkholes) upland wildlife habitat, and riparian areas.

WHIP Access Control Practice Requirements:

1. To be eligible for cost-share, livestock must be present on the offered acres and access control using fencing must be used to exclude livestock from WHIP contracted land, wildlife habitat, or sensitive areas.
2. This practice must meet or exceed the TN FOTG standard for Fencing (code 382).
3. Four (4) strands of wire are the maximum cost-share.
4. Eligible components include high tensile wire, barbed wire, posts, gates, energizer, and labor.
